Shimoni Campaign offers Transparency through Live Donation Tweets

The Shimoni Campaign for Flagstaff City Council is excited to announce a new level of transparency around campaign funding to the public. The Campaign has created a program that takes incoming donations and tweets who donated and the amount in real time. This is true transparency around campaign financing! In our opinion, the lack of transparency around campaign funding is at the root of many of our current and past political problems. Transparency around Campaign financing has been an issue at all levels for way too long and we believe in leading by example. Dirty Money didn't make it onto the ballot this year but us candidates can take the initiative and be the change. The program we are using can be adapted by other candidates who are interested and we are happy to assist others in doing so. We are happy to do interviews with any and all media outlets and appreciate your time.
